

Shrimp Larval Feed

Superior formulated feed for all shrimp species.

Green Line - Orange Line - Blue Line

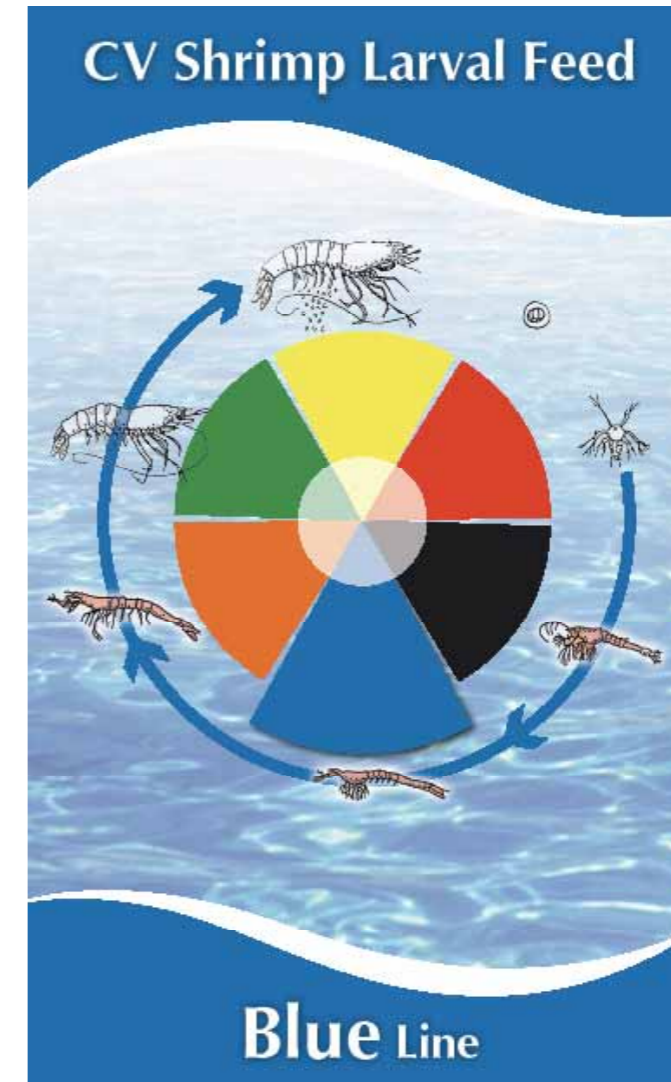

The CV shrimp Larval Feed are produced in the European Community according to the latest nutritional information from carefully selected top quality ingredients.

Different feed lines are available to cater to the requirements of each development stage of the shrimp. All CV Shrimp Larval feeds are produced with the latest processing technology in order to ensure high palatability and digestibility. Particles are carefully separated in order to give precise particle size ranges suitable for each stage.
